JOYWALK

自动扶梯及人行道系列

高 端 定 制 电 梯 领 域 的 国 际 标 杆 品 牌

International benchmark brand in the high-end custom elevator industry

巨立股份伴你美好生活

JOYLIVE - Your friend of wonderful life

Joywalk

巨立Joywalk系列自动扶梯及人行道,以更优化的设计、更完善的性能、更流畅的梯路轨迹、流线型的扶手曲线,以及更可靠的安全系统,使产品的承载能力更强大,客流输送更高效、安全运行更可靠、各种工况更节能、乘坐体验更舒适。具有多种配置和多款装潢可供选择,能与各类风格的建筑物融合协调。适用购物中心/CBD/交通枢纽及其他公共建筑等。

With more optimized design, better performance, smoother step trajectory, streamlined handrail curves and a more reliable safety system, Joywalk series escalators and moving walks make the load capacity of products more powerful, passenger flow transportation more efficient, safety operation more reliable, working conditions more energy-saving and riding experience better. There are many configurations and decorations for choice and can be integrated and coordinated with buildings of various styles.

Optimized Layout Scheme

优化布置方案

定制解决方案，满足公共建筑多元功能与客流需求。
Customized solutions to meet the diverse functions of public buildings and passenger flow demand.

大型客流、双向交叉排列

Large scale passenger flow, two-way cross arrangement

超大型城市综合体，节省扶梯安装空间，集中高效，应对上下客流。
Ultra large urban complex - save escalator installation space, concentrating and efficient, coping with the passenger flow up and down.

大型客流、双向连续排列

Large passenger flow, two-way parallel arrangement

地铁站机场等交通枢纽/大型广场，直达地下设施，可满足连续或间歇性巨大客流需求。
Subway stations, airports and other transportation hubs/large squares access to underground facilities irectly, meet continuous or intermittent huge passenger flow needs.

小型客流、单向单排列

Small passenger flow, one-way single arrangement

中大型购物中心，分散和环形客流，增进建筑内逗留时间，提升浏览体验。
Shopping center, dispersing and circular passenger flow - enhance stay time in building and improve browsing experience.

小型客流、单向连续排列

Small passenger flow, one - way continuous arrangement

中大型购物中心写字楼，可直达地库，分散均衡客流同时提升客流集散效率。
Shopping central, office building, access to basement directly, to disperses and balances passenger flow while improving passenger flow collection and distribution efficiency.

Design and Decoration

装潢选项

定制外观装潢与照明
舒适的搭乘
与建筑景观浏览体验
提升建筑审美

Customize the appearance of decoration and lighting
Comfortable riding and architectural landscape
browsing experience, improve
architectural aesthetic.

Service Team

服务团队

100+全国分支机构
22年专业维保团队
365x24小时守护乘客安全

100+ national branches
22 years professional maintenance history
365x24 hours for passenger safety

Safety Device and Function Options

安全装置及功能选项

遵循欧洲EN115
最新标准设计
多达30项
安全保护装置和设置
Comply with European EN115
latest standard design,
30 safety protection devices and
functions.

标准装置

Standard device

缺相、错相保护	Phase deficient /loss protection	警戒线	Warning line
马达超载保护	Motor overload protection	紧急停止按钮	Emergency stop button
电器回路保护	Electric circuit protection	围裙板保护	Apron protection
扶手带入口保护	Handrail inlet protection	制动器保护	Brake protection
梳齿板安全保护装置	Comb plate safety protection device	检修安全开关	Inspection safety switch
梯级(踏板) 塌陷保护装置	Step(pedal) fall protection device	梯级照明	Step lighting
驱动链断裂保护	Drive chain crack protection	自动警铃装置	Automatic alarm
梯级(踏板) 链断裂保护	Step(pedal) fracture protection device	扶手带断裂保护装置	Handrail anti-crack device
超速保护	Over-speed protection	扶手带速度监控	Handrail speed monitoring
非操作逆转保护	Non-operation reversal protection	围裙板刷	Apron brush

选配装置

Optional functions

防火卷帘门连装置	Fire shutter device
紧急制动器	Emergency brake

标准功能

Standard function

扶手入口	Handrail entrance	紧急停止	Emergency stop
自动加油	Automatic oiling	检修运行	Inspection running
滚轮内置梯级链	Roller built-in step chain	登梯照明	Comb lighting
故障显示器	Fault indicator	安全装置	Safety device
梯级警界灯	Step warning light	围裙板刷	Apron brush
双向运行	Two-way operation		

选配功能

Optional function

运行方向指示	Direction indicator	围裙照明	Apron lighting
自动启动/停止	Automatic start/stop	加热装置	Heating equipment
斜扶手	Oblique handrail	油水分离器	Oil-water separator
扶手照明	Handrail lighting	变频控制技术	Frequency conversion control technology
梳齿照明	Comb lighting		

Joycloud Elevator IoT

巨立云电梯物联网

巨立云 5.0- 大数据智慧管理系统，
为电梯运行提供全周期数字化服务

Joycloud 5.0-Big data smart management system,
providing whole cycle digital services for elevator running

预测性维护

Predictive Maintenance

对电梯的运行实施动态监测，以做到预测性维护。
Active diagnosis of elevator running in time to predict maintenance.

网格救援

Grid-layout rescue

电梯故障时主动提示并进行网络定位，
监控中心主动派遣专业技术工程师赶赴维修。
When elevator breaks down, the system prompts and makes accurate positioning, monitoring center will dispatch engineer to site for rescue.

远程监控

Remote monitoring

通过 AI 摄像头及各种传感器，实现困人检测、气罐检测、电瓶车检测等实时监控，及时发现问题，高效实时管控电梯本体安全。
Through AI cameras and various sensors, the realtime monitoring of trapped persons, gas cylinders, electric bikes can be realized to promptly identify issues and efficiently manage elevator safety in real time.

在线维保

Online maintenance

自动生成电梯专属健康档案和维保诊断报告，通过 AI 对比技术，对维保工作进行判断，提高维保质量，预测保养时间，提前制定保养计划并自动推送。
Automatically generate elevatorspecific health records and maintenance diagnosis reports, use AI comparison technology to judge maintenance quality and achieve high-quality maintenance; Predict maintenance time, make maintenance plans in advance andpush them automatically.

在线安装

Online installation

从电梯出厂到交付使用，安装过程全监控。
From the elevator delivery to the client using, the whole installation process is fully monitored.

人机互动

Interactive system

实现智能手机与电梯语音、视频等多媒体互动体验。
Interactive experience of voice and video between smart phone and elevator.
